CAN I GET THE PERFECT POUT?

ELLE's Stacey Duguid, 32, went under the needle to get bee-stung lips. Here's what happened...

lines'), once into my bottom lip and squeezed into place between jabs. Easy.

But what I'm left looking at 10 minutes later isn't pretty. My mouth is bleeding

My appointment starts with a local anaesthetic. I lie down and two little injections are planted on the inside of each lip.

This doesn't hurt a bit and, thanks to the numbness that follows, neither do the 'big' ones. The filler is injected five times into my top lip (including the corners to 'improve shape and smooth out the little
